Tulugagung, East Java, Indonesia

INTRODUCTION

—I am a passionate Web Developer with a strong focus on Frontend Development, particularly in building responsive, user-friendly interfaces. However, I am also keen on expanding my skill set, and I am open to taking on Fullstack or Backend roles if required. I believe that continuous learning is key to growth, and I am always excited to explore new technologies and improve my development skills. With experience in Next.js, React, Laravel, and various other tools, I am committed to delivering high-quality solutions while constantly enhancing my technical expertise.

WORK EXPERIENCE

PT. Menara Indonesia   Intern

Frontend Web Developer   Agustus - Desember 2024

- Developed web applications using Next.js, TypeScript, and Tailwind CSS.

- Worked with monorepo architecture to manage multiple projects efficiently.

- Contributed to the development of 4 web projects, focusing on responsive and user-friendly interfaces.

Freelance   Part Time

Frontend Web Developer   November 2024 - Januari 2025

- Developed web applications using Next.js with Tailwind CSS for styling and SSG (Static Site Generation) for optimized performance.

- Deployed projects on cPanel for hosting and server management.

- Worked on a project utilizing React and Material UI for building responsive and dynamic user interfaces.

EDUCATION

Universitas Bhinneka PGRI Tulungagung   2021 - 2025

Bachelor of Computer Science

IPK : 3.55

- Studied Laravel for backend development and API creation.

- Gained hands-on experience with Flutter for mobile app development.

- Learned core concepts of algorithms and data structures to optimize problem-solving.

- Developed proficiency in PHP programming language and explored applications in web development.

- Gained foundational knowledge in IoT (Internet of Things) technologies and their integration.

SMAN 1 Karangrejo   2017 - 2020

MIPA

TECHNICAL SKILLS

- Laravel API
- Tauri
- React
- Neon Postgresql
- Node.js
- S3
- Prisma ORM
- NGINX
- OAuth
- Drizzle ORM
- Tailwind CSS
- GIT
- Next Js Fulltack
- Typscript
- Redux Toolkit

FEATURE PORTOFOLIO

Murotal Desktop   Finished

—A desktop app using Tauri and Next.js for creating and managing custom murotal playlists.

Web Monitoring   onProgress

—Fullstack web app built with Next.js and integrated with IoT for real-time water quality monitoring across multiple devices. Currently under development for my final thesis.

Builder and Shortlink   onProgress

—In development: a customizable link shortener with custom domains and a Linktree-like builder, built with Next.js (Fullstack) and planned for multi-tenant support.

Arfixcode   Finished

—A web app using Laravel API and React.js to store, visualize, and search code snippets by category, title, and description.

Sales Car Blog   Finished

—Built with Next.js, Prisma ORM, and OAuth, this blog platform includes a car sales marketplace. Responsiveness is still in progress.

Crud Studio   Finished

—Crud Studio leverages Framer Motion for smooth animations, delivering a dynamic and engaging user experience for modern business profiles.

Portofolio V2   Finished

—Fajarfe.me is the second iteration of my portfolio website, offering a refreshed design with an OS-inspired interface. This version is currently under development, showcasing my ongoing work and projects..

Portofolio V1   Finished

—I created this website as a personal branding to share information about my background, experience, expertise, and projects that I have worked on. The portfolio is also presented with examples of the best work. The goal is to build relationships and strengthen my personal branding image. I am committed to updating and improving this website to keep it relevant and inspiring to others...
